

Architects of Air

# WORKSHOP

## Building with Air and Light

Explore the principles of pneumatic architecture through creative teamwork in the building of inflatable structures

Architects of Air is well known for their monumental pneumatic sculptures. Marking 25 years of touring, we now offer an introduction into the design of pneumatic architecture through a hands-on build workshop.

Combined with hosting one of Architects of Air's luminaria, the workshop enriches the luminarium-experience. We will personally guide workshop participants through and around the luminarium, explaining its architecture, intricate design and technical features.

Keen to promote the skill of inflatable design and construction, we offer short (1 day) and long-term workshops.

We work with you to tailor the workshop and we are able to accommodate regular groups (10 persons) as well as large groups up to 100 persons.

**More information & booking**  
The workshops are a coproduction between Architects of Air and Studio Memo. For more information please contact:
